Specify the type of information that the custom field will contain.

Data Type

☐ None Selected Select one of the data types below.

☐ Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☐ Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☐ Roll-Up Summary (1) A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☐ Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☒ Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

☐ External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

The screenshot displays the 'New Lightning App' configuration window in Salesforce. The interface includes a sidebar on the left with navigation options like 'App', 'Data', 'Maps', 'Apps', 'Components', 'External Services', 'Lightning', and 'Mobile'. The main content area is titled 'New Lightning App' and contains two primary sections: 'App Details' and 'App Branding'. In the 'App Details' section, the 'App Name' is set to 'My_App', the 'Developer Name' is 'My_App', and the 'Description' field is empty. The 'App Branding' section shows a blue square image with a white 'M' and a primary color hex value of '#0070C2'. Below these sections is the 'App Launcher Preview' which shows a blue button with the text 'My' and a grey button with the text 'My_App'. A 'Next' button is located at the bottom right of the configuration window. At the bottom of the screen, a table lists various Salesforce applications and their details.

The screenshot displays the Salesforce Lightning App Builder interface. A modal window titled "New Lightning App" is open, showing the process of selecting features for a new app. The modal is divided into two main sections: "Available Features" on the left and "Selected Features" on the right. In the "Available Features" section, a search bar contains the text "sy", and a list item "Salesforce API Only System Integrations" is visible. In the "Selected Features" section, the item "System Administrator" is listed. Below these sections is a horizontal timeline with five markers. At the bottom right of the modal is a "Save & Finish" button. The background interface shows the Salesforce App Manager sidebar on the left and a table of app configurations at the bottom.

Plural Label **Example:** Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name **Example:** Account

Description

Context-Sensitive Help Setting

☒ Open the standard Salesforce.com Help & Training window

☐ Open a window using a Visualforce page

Content Name

Enter Record Name Label and Format

The Record Name appears in most sources, including related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Specify the type of information that the custom field will contain.

Data Type

Select one of the data types below:

- ☐ None Selected
- ☐ Auto Number
 - A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
- ☐ Formula
 - A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
- ☐ Roll-Up Summary
 - A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
- ☐ Lookup Relationship
 - Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
- ☒ Master-Detail Relationship
 - Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create roll-up summary fields on the master record to summarize the detail records.
- ☐ External Lookup Relationship
 - Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
