Fields & Relationships

Field Information

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected

Select one of the data types below.

☐ Auto Number

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☐ Formula

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☐ Roll-Up Summary

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☐ Lookup Relationship

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☒ Master-Detail Relationship

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

☐ External Lookup Relationship

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

- ☐ Checkbox
- ☐ Currency
- ☐ Date

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

<https://namuthalvan-dev-ed.develop.lightning.force.com/one/one.app#/setup/navigationMenu/home>

The screenshot displays the 'New Lightning App' configuration window in Salesforce. The interface is clean and modern, with a light grey background. On the left, a sidebar shows the navigation menu with options like 'App', 'Data', 'Maps', 'Apps', 'Components', 'External Services', 'Lightning', and 'Mobile'. The main content area is titled 'New Lightning App' and contains two primary sections: 'App Details' and 'App Branding'. The 'App Details' section includes input fields for 'App Name' (filled with 'My_App'), 'Developer Name' (filled with 'My_App'), and a 'Description' field (placeholder text: 'Enter a description...'). The 'App Branding' section features an 'Image' upload area (showing a blue square with a white 'M') and a 'Primary Color Hex Value' field (filled with '#0070C2'). Below these is the 'App Launcher Preview' section, which shows a blue button with the text 'My' and a grey button with the text 'My_App'. A 'Next' button is located at the bottom right of the configuration window. At the bottom of the screen, a table lists the components of the app, including 'Queue Management', 'Sales', and 'Lightning', with their respective descriptions and status indicators.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email, from that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distances.

Allows users to enter any number. Leading zeros are removed.

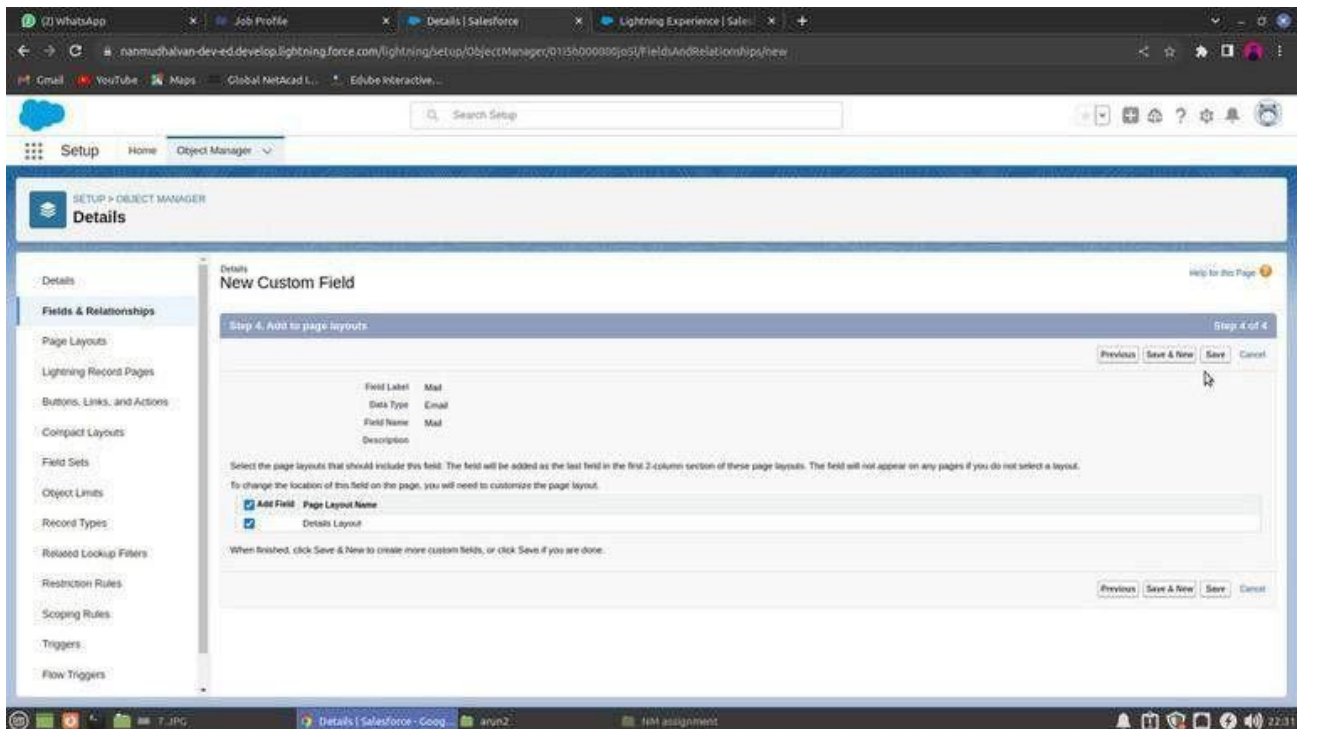

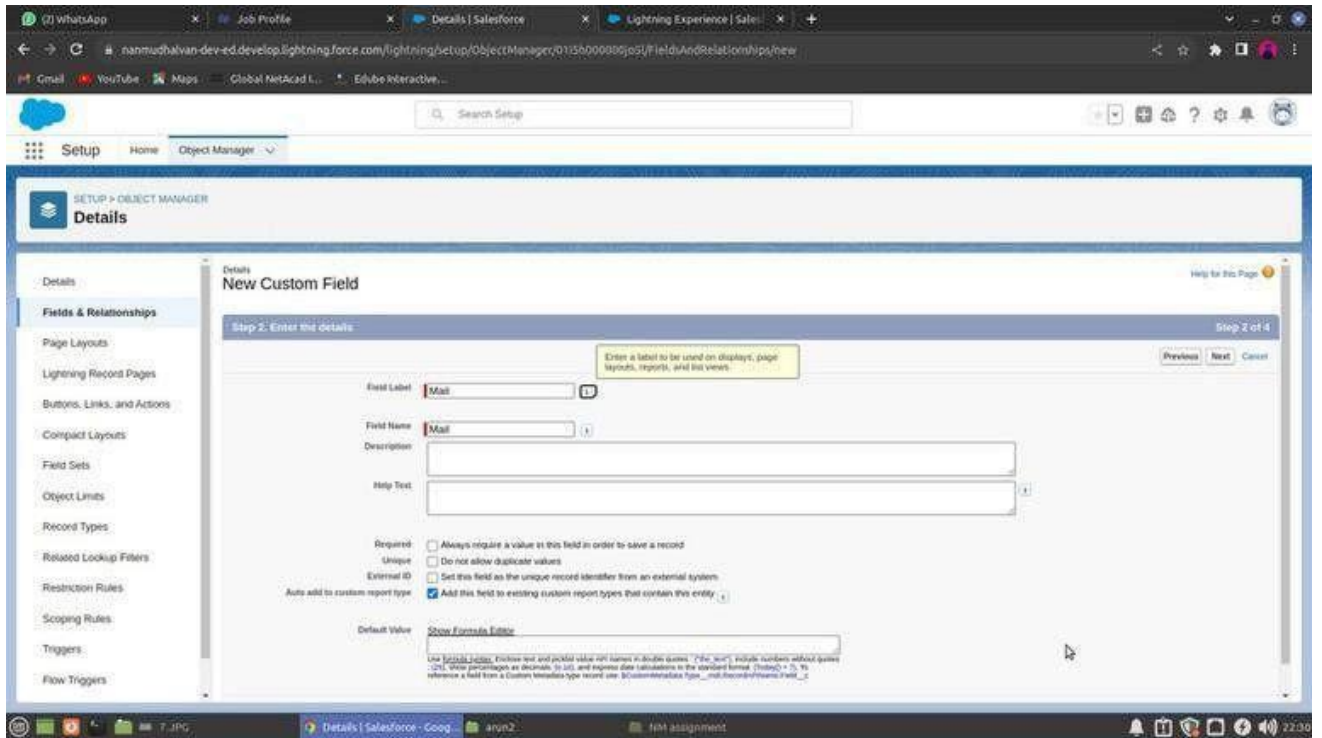

Allows users to enter a percentage number, for example, "10" and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Navigation: Setup, Home, Object Manager

Left Sidebar: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules

Section: SETUP > OBJECT MANAGER Customer

Sub-Section: Add Custom Field

Specify the type of information that the custom field will contain.

Data Type

Select one of the data types below:

- ☐ None Selected
- ☐ Auto Number
 - A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
- ☐ Formula
 - A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
- ☐ Roll-Up Summary
 - A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
- ☐ Lookup Relationship
 - Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
- ☒ Master-Detail Relationship
 - Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create roll-up summary fields on the master record to summarize the detail records.The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.
- ☐ External Lookup Relationship
 - Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
